About the ProCollection Font Cartridge

This manual describes the contents of and how to effectively use the HP **ProCollection** font cartridge.

The HP **ProCollection** font cartridge offers the following special features:

- 6 typefaces creating a total of 65 fonts
- Small, fixed pitch fonts that are specifically designed for spreadsheet applications
- TmsRmn and Helv typefaces available in the Legal symbol set
- Compatibility with the entire LaserJet family of printers

The **ProCollection** font cartridge contains the following six typefaces, which create a total of 65 different fonts:

- Line Printer
- Courier
- Prestige Elite
- Letter Gothic
- TmsRmn
- Helv

The **ProCollection** cartridge provides both fixed pitch and proportionally spaced fonts in a combination of medium, **bold**, and *italic* styles. The **ProCollection** font cartridge contains all of the fonts shown in Tables 1 through 6. A sample of each font is also provided (see **ProCollection Font Cartridge Contents**).

If you are using a software package that supports font selection, the information located throughout this manual will help you in achieving the best use of your font cartridge.

ProCollection Font Cartridge

Contents

With the **ProCollection** font cartridge installed, you can print with any of the fonts shown and described on the following pages. The **ProCollection** fonts can be used in addition to your printer's internal fonts.

Actual Sample using Line Printer.

Line Printer is a small, fixed pitch (all characters are the same width) typeface which is perfectly suited for tables, forms, and columns of data. Its design is modern and easy to read in the 8.5 point size.

Courier

Dear Ms. Eandi,

Thank you so much for telling me about font cartridge. It has improved my product manager thinks I have improved my typing reality I have learned to use a **Hewlett-P** Printer.

Calling the *Customer Assistance Line* a questions I had about using the product w and I now know how to access all 65 diffe like Courier for memos and reports.

Actual Sample using Courier.

Courier is a popular "typewriter" style typeface for general purpose word processing applications. The **ProCollection** cartridge offers Courier in both 10 point, 12 pitch (12 characters per inch) and 12 point, 10 pitch (10 characters per inch) for a variety of applications requiring fixed pitch fonts.

Actual Sample using Prestige Elite.

Prestige Elite is an easy to read, fixed pitch typeface which is ideally suited for word processing applications. Although originally designed as a typewriter typeface, Prestige Elite has migrated to a variety of applications. It has become particularly popular when used for legal documents and business correspondence. The **Pro-Collection** font cartridge offers Prestige Elite in both the ASCII and Legal symbol sets to enhance the useability of these fonts.

Actual Sample using Letter Gothic.

Letter Gothic is a bold, modern, fixed pitch typeface that lends itself well to tabulated lists and spreadsheets. Its clean, legible design also makes Letter Gothic an excellent choice for information communications. The small 3.6 point (27.27 characters per inch) and the 6 point (18.75 characters per inch) Letter Gothic fonts offered in the **ProCollection** cartridge are extremely useful when printing dense spreadsheets where consolidating a lot of information on a single page is of paramount importance.

Product Boosts Sales by Two Million

Record sales of the new line of music boxes has boosted first quarter revenues to the tune of 2 million dollars. It is expected that by the year 1995, one out of every 2 people in the United States and Canada will own a music box.

On the drawing boards are music box watches, dash-board models for cars, waterproof boxes for showers, ultra-light boxes for backpackers, and even an amplified music box that plays a disco version of "*Que Sera Sera*."

Music boxes with figurines depicting the following occupational motifs will be available in June: *The Purchasing Agent*, *The Lottery Winner*, *The Graphics Designer*.

Actual Sample using TmsRmn.

Hewlett-Packard's TmsRmn typeface possesses extreme typographic legibility making this our most popular typestyle for text, newsletters, memos, reports, and any other document requiring a professional "typeset" appearance. TmsRmn is serified and proportionally spaced, which adds to its readability. The Pro-Collection cartridge offers TmsRmn in both ASCII and Legal symbol sets. The legal characters in the TmsRmn typeface are a new addition to our font collection. They open new opportunities in the legal applications.

Helv

NUTS

Deluxe Assortment

Winter 1988

Peanut--A tasty, unique assortment from plantations in Africa and Southeast Asia. And, yes, from Georgia too!

Almond--They're popular and they're versatile. Available whole, sliced or chopped, they're equally at home in Mom's favorite recipes.

Pistachio--With an unusually subtle and delicate flavor, these perennial favorites will be perfect for either sweet or savory dishes.

Pecan--Another great favorite in the bakery. And our own superb pecans will satisfy even the most discriminating tastes.

Actual Sample using Helv.

Helv is Hewlett-Packard's version of one of the world's most popular sans-serifed typefaces. Helv is proportionally spaced, which adds to its superb legibility. Its flawless, modern, and clean design makes an excellent professional typeface for eye-catching text and headings. The 8 point Helv offered in the **ProCollection** cartridge is excellent for legible footnotes. All of the Helv fonts in the **ProCollection** cartridge are available in the ASCII symbol set. In addition, the 14 point Helv bold font is also available in the Legal symbol set.

Using ProCollection Cartridge Fonts

Read the following information on cartridge installation and font selection priority before selecting the ProCollection cartridge fonts.

Installation

To install the **ProCollection** font cartridge on any one of the LaserJet family of printers, follow the installation instructions presented below.

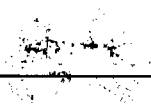

NOTE

If you are installing the **ProCollection** font cartridge on a LaserJet 2000 printer, the term "off-line" indicates that the printer should be powered off.

1. Press the ON LINE key to place the printer in the off-line state (light off).
-

CAUTION

Do not insert or remove font cartridges while the printer is on-line.

2. Insert the font cartridge, label side up, into an available slot.

Press the cartridge in firmly to make sure that it is solidly seated in the slot.

3. Press the ON LINE key to return the printer to the on-line state (light on).
4. To remove the font cartridge, press the ON LINE key to place the printer in the off-line state (light off). Grasp the edges of the cartridge and pull it out. Press the ON LINE key to return the printer to the on-line state (light on).

NOTE

If the font cartridge is inserted or removed while the printer is on-line, you will receive an **FE CARTRIDGE** error message. If you receive the **FE CARTRIDGE** error message, turn your printer OFF and back ON.

Software Driver Availability

Most software packages send commands to the printer to select fonts. All software packages select fonts in different ways. Some software packages use "printer drivers" or "printer definitions" to select fonts. If you do not have an HP **ProCollection** driver, call your software company to request one.

Font Source Priority

In some instances a selected font is available from more than one source. When certain fonts are requested, a downloaded soft font is selected first. If the requested soft font is not available, a cartridge font will then be used. If the requested cartridge font is not available, then an internal font will be used. **When choosing a font, the font must be available from one of these sources.** If the font you request is not available, a font, whose characteristics most closely resemble those of the requested font, will be selected.

Some font cartridges contain their own default fonts (noted by an asterisk * on the cartridge label).

Font Selection Priority

The printer uses the following criteria to determine font priority.

1. A font selected using your software (or a printer command).
2. A default font selected using the control panel (this applies only if your LaserJet printer allows you to select fonts using the control panel).
3. A default font contained in an installed font cartridge.
4. The factory default font resident in the printer.

The term "default font" refers to the font that is in use when the printer is reset.

Printer Commands

Use Tables 1 through 6 to select a font from the **ProCollection** cartridge. These tables list the entire printer command, including the orientation and symbol set designators. Read the following instructions before using the tables:

- Use of the full printer command ensures correct font selection for any application. For further information on printer commands see the Technical Reference Manual for your printer.
- Printer commands always begin with the escape character E_C . The escape character is followed by a unique series of letters and numbers that tell the printer what to do.

The escape character E_C is often represented by either 1B (Hexadecimal) or 27 (Decimal).

Before using printer commands, take a moment to compare these characters:

Lower-case l - l

Upper-case O - O

Number one - 1

Number 0 - $\emptyset$

Don't let the differences between these characters confuse you. Many printer commands use the lower-case letter l (l) and the number one (1), or the upper-case letter O (O) and the number zero ($\emptyset$). These characters may not appear on your screen as shown here.

- Use $\text{E}_C\&\text{l}\emptyset\text{O}$ to specify portrait orientation. Use $\text{E}_C\&\text{l}1\text{O}$ to specify landscape orientation.
- Use $\text{E}_C(\emptyset\text{U}$ to specify the ASCII symbol set. Use $\text{E}_C(1\text{U}$ to specify the Legal symbol set.

This example shows the difference between portrait and landscape orientation. The commands which select each orientation are included.

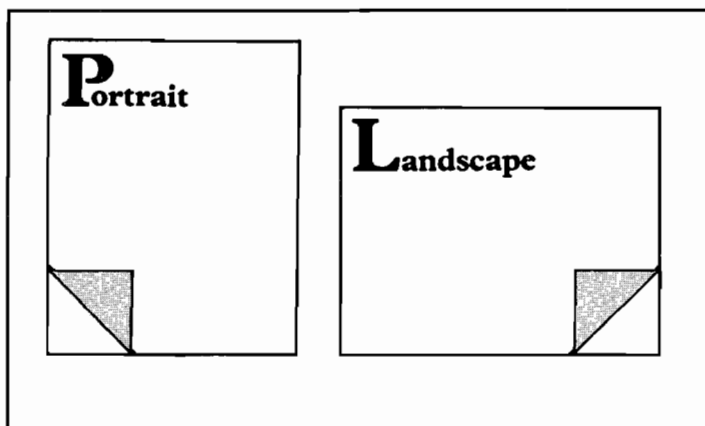

Figure 1. Setting Portrait and Landscape Orientation.

Printer Command Examples

This example shows how to select the Courier (typeface), portrait (orientation), Legal (symbol set), 10 pitch, 12 point, medium font:

```
^C&l0O^C(1U^C(s0p10h12v0s0b3T
```

This example shows how to select the Courier (typeface) landscape (orientation), ASCII (symbol set), 10 pitch, 12 point, medium font:

```
^C&l1O^C(0U^C(s0p10h12v0s0b3T
```

Refer to your printer's User's Manual or Technical Reference Manual for additional information on printer commands.

In Case Of Difficulty

Check the following if you are having trouble using the **Pro-Collection** font cartridge:

- Is the font cartridge firmly seated in the slot? Push it all the way in to make sure.
- Are you using the correct font selection command? Verify this by comparing the command you entered to the one listed in this manual.

Before using printer commands, take a moment to compare these characters:

Lower-case l - ℓ

Upper-case O - Ø

Number one - 1

Number 0 - Ø

- Are you familiar with the way in which your software allows you to define and change fonts? If you are having trouble, check your software manual to find out what method to use when selecting fonts.

Error 21

Error 21 is displayed on the printer control panel when data saturation occurs. Error 21 indicates that the formatting process of the LaserJet printer cannot keep pace with the rotation of the photoconductive drum. Since this drum cannot be stopped on a LaserJet printer, the page data must be placed on the first pass.

In some cases you might see the Error 21 displayed on the printer control panel when using the small Letter Gothic fonts (18.75 and 27.27 pitch) in a dense spreadsheet, particularly in portrait orientation.

The following is a list of possible reasons for receiving Error 21.

- Too many characters on the page.
- Too many characters per line.
- Too many lines per inch.
- Too many lines, boxes, or graphics on the page.

The following are possible ways to correct Error 21:

- Reduce the number of characters on the page.
- Reduce the number of characters per line.
- Increase the spacing between the lines (lines per inch).
- Reduce the amount of lines, boxes or graphics.
- Try printing in landscape orientation.

FE Error

If the font cartridge is inserted or removed while the printer is on-line, you will receive an **FE CARTRIDGE** error message. If you receive the **FE CARTRIDGE** error message, turn your printer OFF and back ON.

Calling for Help

If you are having trouble accessing fonts in the cartridge and are in need of assistance, you can call the authorized HP dealer where you purchased your **ProCollection** font cartridge.

Hewlett-Packard also offers support through the LaserJet Assist Line. A customer assistance operator can offer advice to help solve your technical problems. The Assist Line number is:

(208) 323-2551

The LaserJet Assist line is open from 7 a.m. to 6 p.m. (Mountain Standard Time), except for Wednesdays, when it is open from 7:00 a.m. to 4:00 p.m.

Reference Information

The information included in this section is of special interest to programmers, or to those who need to print special characters.

ProCollection Symbol Sets

Symbol sets are unique groups of characters. Each symbol set is designed with different applications in mind.

Most of the fonts in the **ProCollection** cartridge can be used with either the ASCII or Legal symbol sets (see Tables 1 through 6 for available symbol sets).

Table 7 shows the minor differences between the ASCII and Legal symbol sets.

ASCII Keystroke	"	'	<	>	\	^	`	{		}	~
Legal Symbol	"	'	=	¢	®	©	°	§	¶	†	™
Decimal	34	39	60	62	92	94	96	123	124	125	126

Table 7. Symbol Set Comparison.

NOTE

These Legal characters will not be displayed on your screen, however, they will appear correctly on your printout.

Symbol Set Tables

The following Legal and ASCII tables identify all of the characters available in the **ProCollection** font cartridge. The shaded areas in Tables 8 and 9 denote printer control code areas. Depending upon the type of computer or software package you are using, there may be several ways to print these characters. Refer to your computer or software manuals for information on printing the characters.

Hewlett-Packard Custom Font Services

Hewlett-Packard Custom Font Cartridges and Soft Fonts are now Available.

Design your own custom font cartridge or soft font package to fit your particular needs. Choose from the following font options:

- Any font from an existing Hewlett-Packard standard font cartridge product.
- Any font from the Hewlett-Packard AC-AG, DA, DC or EA Soft Font Collection.
- Arabic, Hebrew, and Cyrillic typefaces.
- Bar codes including 3 of 9, Codeabar, UPC, and others.
- Custom symbol set mappings.
- Company logos.
- Signatures.
- Soft font site licensing.

For information on these services, contact Hewlett-Packard Boise Division Product Specials, 11311 Chinden Blvd., MS 159, Boise, Idaho 83714, (208) 323-3684.

Ordering Fonts

Hewlett-Packard will be offering a growing library of different font cartridges.

Check with your authorized HP dealer to see which new font products are available

To locate the dealer nearest you call:

USA - 1-800-752-0900

Canada - 1-800-387-3867

Other countries: contact an authorized HP dealer or local HP sales office.

If your dealer is temporarily out of stock, call HP DIRECT:

USA - 1-800-538-8787

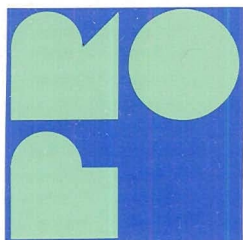

Canada

Toronto - 416-671-8383

Ontario/Quebec - 1-800-387-3417

Other Provinces - 1-800-387-3154
